

Swimmers Itch Project Update Addendum

Re: Goal for 2020 Swimmers Itch Control Fund

The anticipated cost for this first year effort was stated as \$2,000 in our previous message, which assumed one merganser brood. We have learned that we have at least two Common Merganser broods that habituate our lake, which makes the more realistic and likely cost run between \$4,000 and \$5,000 next year.

Hence, we have raised our fund raising goal to \$5,000 knowing that any surplus that may remain will be retained there in and carried over toward 2021 expenses.

Respectfully,

Jim Gilleylen, Vice President
Intermediate Lake Association
Chairman, Swimmers Itch Committee
